

TEMPORARY POWER SWITCHBOARDS

Excellerate Products™ Temporary Power Switchboards deliver fast and flexible power distribution that meets code requirements for temporary sites. Whether you're powering a construction site, event or responding to a disaster location, our rugged, rental-ready solution simplifies deployment, reduces downtime and keeps your operations energized safely and efficiently.

POWER WHERE YOU NEED IT. SPEED WHEN YOU NEED IT.

BUILT SAFE, BUILT STRONG:

Engineered for safety, security and durability to help keep your people and projects secure.

SERVICE-READY FOR THE LONG HAUL:

Designed with standardized components and accessible layouts to simplify maintenance and reduce downtime.

INSTANT POWER, ZERO HASSLE:

Rapid setup with simplified connections to get your site energized fast while reducing installation time and labor costs.

Voltage Range	480 VAC Max.
Phase Configuration	3-Phase, 4-Wire
Short-Circuit Rating	100kA RMS Max
Modular Options	Breaker flexibility, remote switch operator
Design Standards	UL 891, UL 50E, NEMA PB 2/2.1, NFPA 70, IEEE C37.21

SUPPORT THAT EXTENDS BEYOND THE INSTALL

Product Warranty and Service Support: Every Excellerate product includes a one-year standard product warranty, with tiered service packages available for added peace of mind. Our nationwide support team can assist with installation, commissioning and ongoing maintenance. We also offer preventive maintenance Service Level Agreements (SLAs) that cover annual and semi-annual tasks such as cleaning, electrical testing, thermal imaging, grounding checks and visual inspections to reduce downtime and extend product life.

Spare Parts Kits and Training: We offer a full catalog of spare part kits, individual replacements and stocking options. To keep your team confident and your equipment running smoothly, we provide blended training programs for operators and maintainers, combining web-based courses with hands-on exercises for safe operation and maximum uptime.
