

UL 891 LV SWITCHBOARDS

BUILT FOR SPEED. TRUSTED FOR SCALE. DESIGNED FOR CERTAINTY.

Excellerate Products™ UL 891 LV Switchboards are built to meet your changing needs with an engineered configurable design that enables rapid deployment, scalability and trusted performance. We remove complexity, ensuring predictable outcomes so projects run smoother and on time.

SPEED TO POWER, WITHOUT COMPROMISE

Pre-engineered UL 891 switchboards deliver faster, predictable lead times while maintaining full compliance and factory testing.

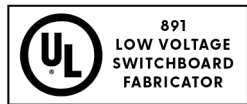

SCALABLE BY DESIGN, READY FOR WHAT'S NEXT

Modular architectures enable seamless expansion and future infrastructure without re-engineering.

SERVICE & SUPPORT

Proactive monitoring, national expert service coverage and warranty support that keeps your infrastructure reliable and compliant — for its lifecycle — giving you long-term peace of mind.

INDUSTRIES

DATA CENTERS

COMMERCIAL/MANUFACTURING

INDUSTRIAL

Flexible architecture that adapts to your project's needs without the delays of custom engineering.

ENCLOSURE TYPES

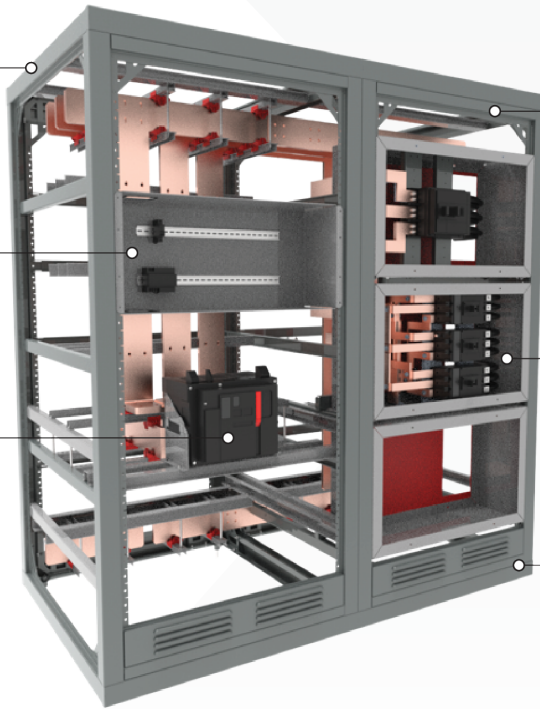

- Indoor [Type 1]
- Outdoor [Type 3R]

BUS

- Aluminum
- Copper

MAIN BREAKER

- Ampacity up to 4000A

CABLE ENTRY/EXIT

- Top/Bottom [Type 1]
- Bottom [Type 3R]

DISTRIBUTION BREAKER MODULE

- Molded Case or Insulated Case

BASE OPTIONS

- Skid-mounted available, forklift accessible from all four sides

SUPPORT THAT EXTENDS BEYOND THE INSTALL SERVICE THAT PROTECTS UPTIME AND OPERATIONAL CERTAINTY

Excellerate Products™ creates UL 891 switchboards with a service-first mindset—designed to minimize downtime, simplify maintenance, and keep power infrastructure ready as capacity grows.

Protective Lifecycle Management: Our Service Level Agreements [SLAs] and “Mid-Life Reset” programs shift your strategy **from reactive repairs to proactive asset protection** and use scheduled maintenance to extend product life and delay full replacement costs.

24/7 Real-Time Oversight: Get **immediate peace of mind with a national service network and optional integrated remote monitoring** that allows experts to diagnose and resolve technical issues instantly and remotely.

Sustained System Readiness: We keep your infrastructure “ready-to-run” with a rapid-response catalog of product-specific spare part kits designed to **minimize downtime** during critical events.

Long-Term Technical Certainty: Beyond the initial installation, your investment is secured by a standard **1-year warranty with flexible extended options**, ensuring your switchboard remains a reliable, compliant foundation as your power needs evolve.
